Deutsche Akkreditierungsstelle

Annex to the Accreditation Certificate D-PL-18566-01-02 according to DIN EN ISO/IEC 17025:2018

Valid from: **07.07.2026**

Date of issue: 28.09.2026

This annex is part of the Accreditation Certificate D-PL-18566-01-00.

Holder of the Accreditation Certificate:

Minz Prüf + Test GmbH
Rübsangerstraße 52, 65551 Limburg an der Lahn

with the location

Minz Prüf + Test GmbH
Rübsangerstraße 52, 65551 Limburg an der Lahn

The testing laboratory meets the requirements of DIN EN ISO/IEC 17025:2018 to carry out the conformity assessment activities listed in this annex. The testing laboratory meets additional legal and normative requirements, if applicable, including those in relevant sectoral schemes, provided that these are explicitly confirmed below.

The management system requirements of DIN EN ISO/IEC 17025 are written in the language relevant to the operations of testing laboratories and they conform to the principles of DIN EN ISO 9001.

Tests in the field: Electrical Engineering

This annex to the certificate was issued by the Deutsche Akkreditierungsstelle GmbH (DAkkS) and is digitally sealed.
This annex to the certificate is only valid together with the written accreditation certificate and reflects the status as indicated by the date of issue. The current status of any valid and surveyed accreditation can be found in the directory of accredited bodies maintained by Deutsche Akkreditierungsstelle GmbH (www.dakks.de).

Flexible Scope of Accreditation:

The testing laboratory is permitted to use standardised or equivalent test methods listed here with different issue dates without being required to prior inform and obtain approval from DAkkS (flexibilization according to category A).

The testing laboratory has an up-to-date list of all test methods within the flexible scope of accreditation. The list is publicly available on the website of the testing laboratory.

Scope Number	Standard or Test Method	Title of the Standard or Test Method
1.1	DIN EN 62631-3-1	Dielectric and resistive properties of solid insulating materials - Part 3-1: Determination of resistive properties (DC methods) - Volume resistance and volume resistivity - General method
1.2	DIN EN 62631-3-2	Dielectric and resistive properties of solid insulating materials - Part 3-2: Determination of resistive properties (DC methods) - Surface resistance and surface resistivity
1.3	DIN EN 62631-3-2, Ber1	Dielectric and resistive properties of solid insulating materials - Part 3-2: Determination of resistive properties (DC methods) - Surface resistance and surface resistivity; Corrigendum 1
1.4	DIN EN 62631-3-4	Dielectric and resistive properties of solid insulating materials - Part 3-4 : determination of resistive properties (DC methods) - Volume resistance and volume resistivity at elevated temperatures
1.5	DIN EN IEC 60112 VDE 0303-11	Method for the determination of the proof and the comparative tracking indices of solid insulating materials
1.6	ISO 14309	Rubber, vulcanized or thermoplastic – Determination of volume and/or surface resistivity
1.7	ASTM D257	Standard Test Methods for DC Resistance or Conductance of Insulating Materials
1.8	ASTM D3638	Standard Test Method for Comparative Tracking Index of Electrical Insulating Materials
